APPLY DESIGN FUNDAMENTALS HOMEWORK /20MARKS

- 1) What is the color wheel?
- 2) Analyse how Hue, Value, and Saturation work together to change the mood of a design.
- 3) Compare Complementary colors and Analogous colors. Which is better for calm designs and why?
- 4) Compare RGB and CMYK color modes. Explain why colors look different on screen and on print.
- 5) Compare Process colors and Spot colors in printing. Which is better for logos and why?
- 6) Create a small color palette using Analogous colors for a nature-based website.
- 7) Pick one product (e.g., juice, perfume, tech device) and design a triadic color scheme suitable for advertising it.
