

## **L4 MMP**

### **CAPTURING PHOTOGRAPHIC IMAGE**

#### **HOMEWORK**

1. Analyze how a well-designed file naming and folder structure improves efficiency in managing large photo collections compared to using default camera file names.
2. Examine the role of metadata in photo organization and analyze how it supports searching, sorting, and long-term archiving of photos.
3. Analyze the differences between sorting and rating photos, and explain how using both together enhances a photographer's workflow.
4. Compare offline backup and online backup methods by analyzing their advantages and limitations in terms of security, accessibility, and data redundancy.
5. Analyze the impact of culling on post-production efficiency and explain why it is considered a critical step after a photo shoot.
