Application

NB: After working on your computer, write the PHP code you used in your notebook.

WORLD MISSION HIGH SCHOOL is a school that provides short course training for Trainees, and it is located in Nyarugenge District, Kigali City. after each training session, they give an assessment to the trainees in order to certify them according to their performance. You are asked to develop a simple PHP script that manages student grades for a class. **The script will use variables, arrays, and functions to calculate and display the average grade, as well as to identify students who have passed or failed.**
