Scenario:

MATESO is a student learning **Web Development**. She is asked to design a simple webpage for **World Mission High School**. The webpage should display the school name, a welcome message, a paragraph about the school, an image, and a line break. While coding, Aline realizes that some HTML tags need **opening and closing tags**, while others do not.

Question

a) Identify the **two main types of HTML tags** that MATESO will use.
b) Explain each type.
c) Give **three examples** for each type.
d) Using the correct tag types, write a short HTML code snippet that shows:

- A heading

- A paragraph

- A line break

- An image
