

HOME WORK: Video Editing?

Instruction: all Answers must be on a clean white paper A4.

1. Define the term "media file" and list common types
2. Explain the advantages of organizing media files compared to leaving them scattered
3. Define file systems and explain their basic function.
4. Define the terms "track" and "timeline" in the context of video editing or audio production
5. Describe how the timeline visually represents the sequencing and duration of events in a video or audio production.
