### INSIDE DETECTIVE JENNY'S OFFICE - NIGHT

Detective Jenny carefully looks at a dimple-shaped trinket found at a crime scene. She sees a pattern - all victims have dimples.

DETECTIVE JENNY (whispering): A dimple collector. We have a serial killer.

She connects the dots, researching past similar cases.

Detective Jenny briefs her team about the dimple collector case. Finding the killer is urgent.

DETECTIVE JENNY: We need to find anyone obsessed with dimples. Look for patterns, connections between victims. Her team is determined to solve the case.

Detective LUMIER, and as you can see these pictures we have on the table, We have found a very important link - all victims visited a specific coffee shop. The killer might target victims there.

DETECTIVE JENNY: Here is a picture of all girls who visited the coffee shop today, One of them has an apparent dimples.

Let's track her location tomorrow.

HORN SHOFI - MORNING

Jay and Keilla decide to explore the town, not knowing about the danger. The mysterious person follows them, blending in. Jay and Keilla enjoy the town square, unaware they're being watched.

JAY (smiling) You know, I never expected our little coffee shop encounter to turn into all this excitement.

KEILLA (teasing) Well, you did promise to add a bit of adventure to my life. I didn't think you meant a real-life mystery, though.

JAY (laughing) Life has a way of surprising us, doesn't it? But I'm glad we're facing it together.

KEILLA (blushing) Smooth talker. But I must admit, I enjoy being the highlight.

JAY (grinning) Well, you're the highlight because you add the chemistry to my life.

KEILLA (teasing) Oh, really? Chemistry, you say? I'm surprised. It's what I study in university.

JAY (smiling) I meant the metaphorical kind of chemistry, don't you know, in the context of relationships "chemistry" is the emotional connection and attraction that two people share.. hmm... the one between us. Not the periodic table kind.

KEILLA (raising an eyebrow) Oh, come on! Even the periodic table has its charms. You just need to appreciate the elements.

JAY (mockingly serious) I must confess, my dear chemist, my knowledge of chemistry is limited to the basics: H<sub>2</sub>O, NaCl, and... well, that's about it.

KEILLA (laughing) You're missing out on the fun stuff, Jay. Chemistry is fascinating! It's like the magic that happens when two elements combine to create something new.

JAY (Teasing) wow... You and me, a perfect blend of elements. So, what would be the chemical formula for that?

KEILLA (playfully) Oh, that's a complex equation, my dear. It

involves a dash of laughter, happiness and a whole lot of  
love.

JAY (grinning) Sounds like the perfect formula to me. Who  
needs the periodic table when I've got you decoding the  
elements of our storyo

KEILLA (winking) See, chemistry isn't that bad. You just  
needed the right lab partner...
